

**Purdue University**  
**College of Education, Department of Educational Studies, Educational Leadership**  
**Building Level Licensing Program**

The requirements for a ***Building Level Administrator License*** have been recently revised and the course delivery restructured to reach more Indiana educators.

- The program requires six graduate core educational leadership courses offered over three semesters, with a 1 credit internship each semester (total 3 credits) for a total of 21 credits for the license.
- Courses are offered in a cohort sequence permitting candidates to finish the license in three semesters (one year) if they take 7 credits offered each semester. Candidates may also choose to take fewer courses over a longer period of time.
- The ***Building Level Licensing Program*** is offered using a hybrid distance learning model. Courses are offered in 8 week modules (2 courses each semester) with a 1 credit internship related to the two courses taken over the full 16 week semester. Two on-campus class meetings are arranged for each course.
- Candidates may enroll as for ***License Only*** if they already have a Master’s degree. The Educational Specialist degree requires 30 credits plus an Ed.S. Project making it a great option to consider with the license.
- All courses have been mapped to the *National Policy Board for Educational Administration* (NPBEA) Standards for Advanced Programs in Educational Administration and the coordinating *Indiana Standards for School Leader – Building Level Standards*. The program has received **National Recognition** from NCATE.

Course offerings are listed below:

Semester One	Semester Two	Semester Three
