Biology Selectives:			10
Elect ten (10) hours of upper division biology courses			

Choose <u>one</u> Intermediate Biology Selective, choose <u>at least one</u> Group A Selective, <u>at least one</u> Group B Selective, satisfy the Base Laboratory requirement, and <u>at least one</u> 50000-level course from Group A Selectives or Group B Selectives. Overlap (Intermediate Selective, A, B, 500, Lab) is allowed, but 10 credits must still be earned.

Research (49400 or 49900 - maximum of 2 credits), BIOL 36701 Principles of Development Lab, and BIOL 44100 Senior Seminar in Genetics, will count toward the 10 credit requirement, but will not satisfy the Group A, Group B, or laboratory requirement.

One of the following Intermediate Biology Selectives:

BIOL	32800	Principles of Physiology[1, 2] (4)
BIOL	39500	Macromolecules[3] (3)
BIOL	41500	Introduction to Molecular Biology[3] (3)

Lab Requirement:
Each student will satisfy each of the following three learning objectives:
Objective 1 – Research planning, literature review, and writing
Objective 2 – Observation, experimentation
Objective 3 – Analysis, simulation, and presentation

Objectives may be met by taking courses according to the following chart:

Courses	Title	Objective 1	Objective 2	Objective 3
BIOL 43900	Laboratory in General Microbiology[4]	X	X	X
BIOL 44202	Animal Physiology		X	X
BIOL 44205	Introduction to LabVIEW		X	X
BIOL 44207	Exploration of Protein Structure		X	
BIOL 44211	Laboratory in Anatomy & Physiology		X	
BIOL 44212	Microscopy and Cell Biology		X	X
BIOL 59100	Field Ecology[7]	X	X	X
BIOL 59500	CryoEM 3D Reconstruction		X	X
BIOL 59500	Data Analysis in Neurosci			X
BIOL 59500	Theory of Molecular Methods[4]	X		X
BIOL 59500	Neural Mech in Hlth Disease[4]	X		X
BIOL 59500	Ecology	X		X

If undergraduate research is used to meet the lab requirement, only three credits may count toward the 10-credit requirement.

Students who successfully complete a Biology Honors Research Thesis have successfully met all three objectives.

Undergraduate Research may be used to meet these objectives. Student must get Research Mentor approval for each objective after that objective is completed. Student must also earn at least four credits of BIOL 49400 or 49900 research.

Consult with your academic advisor for the forms used to obtain Research Mentor for each objective.

A combination of courses and research may be used to meet this requirement.

[1] This may count for the Intermediate Biology Selective and as a Group B course and as the CoS Teambuilding & Collaboration requirement.
[2] These courses are recommended for teaching majors.
[3] Courses chosen for the Intermediate Requirement may satisfy part of the 10 credit requirement.
[4] This course may count for a Group A course and for the Base Lab requirement. You must still complete 10 total credits of biology selectives.
[5] This course may count for a Group A course and as the College of Science Multidisciplinary requirement.
[6] This course may count for a Group B course and as the College of Science Great Issues requirement.
[7] This course may count for a Group B course and toward the Biology Lab Selective. However, you must still complete 10 total credits of biology selectives.
